Contents of volume 22

Mini Review

Schmid RD: Biotechnology in Japan 1984. Part 1. Industrial activities 157

Biotechnology

Adlercreutz P, Holst O, Mattiasson B: Characterization of *Gluconobacter oxydans* immobilized in calcium alginate 1

Afschar AS, Biebl H, Schaller K, Schügerl K: Production of acetone and butanol by *Clostridium acetobutylicum* in continuous culture with cell recycle 394

Amin G, De Mot R, Van Dijck K, Verachtert H: Direct alcoholic fermentation of starchy biomass using amylolytic yeast strains in batch and immobilized cell systems 237

Babel W, Müller RH: Correlation betwen cell composition and carbon conversion efficiency in microbial growth: a theoretical study 201

Bettmann H, Rehm HJ: Continuous degradation of phenol(s) by *Pseudomonas putida P8* entrapped in polyacrylamidehydrazide 389

Clementi F, Moresi M, Rossi J: Effect of medium composition on microbial utilisation of citrus waste by mixed fungal culture 26

Deschamps F, Huet MC: Xylanase production in solid-state fermentation: a study of its properties 177

Doelle HW, Greenfield PF: The production of ethanol from sucrose using *Zymomonas mobilis* 405

Doelle HW, Greenfield PF: Fermentation pattern of *Zymomonas mobilis* at high sucrose concentrations 411

Fond O, Matta-Ammouri G, Petitdemange H, Engasser JM: The role of acids on the production of acetone and butanol by *Clostridium acetobutylicum* 195

Frankena J, van Verseveld HW, Stouthamer AH: A continuous culture study of the bioenergetic aspects of growth and production of exocellular protease in *Bacillus licheniformis* 169

Hahn-Hägerdal B, Häggström M: Production of ethanol from cellulose, Solka Floc BW 200, in a fedbatch mixed culture of *Trichoderma reesei*, C 30, and *Saccharomyces cerevisiae* 187

Holst O, Lundbäck H, Mattiasson B: Hydrogen peroxide as an oxygen source for immobilized *Gluconobacter oxydans* converting glycerol to dihydroxyacetone 383

Horitsu H, Adachi S, Takahashi Y, Kawai K, Kawano Y: Production of citric acid by *Aspergillus niger* immobilized in polyacrylamide gels 8

Hossain M, Brooks JD, Maddox IS: Galactose inhibition of citric acid production from glucose by *Aspergillus niger* 98

Hwang SO, Gil GH, Cho YJ, Kang KR, Lee JH, Bae JC: The fermentation process for L-phenylalanine production using an auxotropic regulatory mutant of *Escherichia coli* 108

Kingdon CFM: An aminoglycoside biosensor incorporating free or immobilized bacterial cells 165

Kinoshita S, Kakizono T, Kadota K, Das K, Taguchi H: Purification of two alcohol dehydrogenases from *Zymomonas mobilis* and their properties 249

Kolhekar SR, Mahajan PB, Ambedkar SS, Borkar PS: Purification and characterization of glucoamylase from a higher yielding mutant of *Aspergillus candidus* link var. *aureus* 181

Křen V, Kochtová M, Burianec Z, Rychtera M: Continuous cultivation of *Candida utilis* yeasts growing on calcium bisulphite waste liquors. Parameter estimation based upon respiration data 329

Layokun SK, Solomon BO, Fatile IA: Application of material and energy balances in the interpretation of intermediate product build-up in batch growth of *Pseudomonas aeruginosa* on n-hexadecane 255

Marty J-L: Application of response surface methodology to optimization of glutaraldehyde activation of a support for enzyme immobilization 88

Mozes N, Rouxhet PG: Metabolic activity of yeast immobilized as supported monolayer 92

Park TH, Kim IH: Hollow-fibre fermenter using ultrafiltration 190

Puls J, Poutanen K, Körner H-U, Viikari L: Biotechnical utilization of wood carbohydrates after steaming pretreatment 416

Schütte H, Hummel W, Tsai H, Kula M-R: L-Leucine dehydrogenase from *Bacillus cereus*. Production, large-scale purification and protein characterization 306

Smeds A-L, Enfors S-O: Large scale production of chromatophores from *Rhodospirillum rubrum* by light-fed-batch cultivation 83

Tanaka M, Song G-J, Matsuno R, Kamikubo T: Optimal conditions for pretreatment of rice straw with n-butylamine for enzymatic solubilization 13

Tanaka M, Song G-J, Matsuno R, Kamikubo T: Evaluation of effectiveness of pretreating rice straw with n-butylamine for improvement of sugar yield 19

Volfová O, Suchardová O, Panoš J, Krumphanzl V: Ethanol formation from cellulose by thermophilic bacteria 246

Wase DAJ, Ratwatte HAM: Variation of intracellular sodium and potassium concentration with changes in agitation rate for chemostat-cultivated *Escherichia coli* 325

Westmeier F, Rehm HJ: Biodegradation of 4-chlorophenol by entrapped *Alcaligenes* sp. A 7-2 301

Williams AG, Withers SE: The production of hemicellulose-degrading enzymes by *Bacillus macerans* in anaerobic culture 318

Yerushalmi L, Volesky B, Szczesny T: Effect of increased hydrogen partial pressure on the acetone-butanol fermentation by *Clostridium acetobutylicum* 103

Yu EKC, Chan MK-H, Saddler JN: Butanediol production from lignocellulosic substrates by *Klebsiella pneumoniae* grown in sequential coculture with *Clostridium thermocellum* 399

Applied Microbiology

Agosin E, Daudin J-J, Odier E: Screening of white-rot fungi on (^{14}C)lignin-labelled and (^{14}C)whole-labelled wheat straw 132

Bono J-J, Gas G, Boudet AM: Pretreatment of poplar lignocellulose by gamma-ray or ozone for subsequent fungal biodegradation 227

Borriss R, Bäumlein H, Hofemeister J: Expression in *Escherichia coli* of a cloned β-glucanase gene from *Bacillus amyloliquefaciens* 63

Castro JM, Liras P, Cortés J, Martin JF: Regulation of α-aminoadipyl-cysteinyl-valine, isopenicillin N synthetase, isopenicillin N isomerase and deacetoxycephalosporin C synthetase by nitrogen sources in *Streptomyces lactamdurans* 32
Claus G, Kutzner HJ: Physiology and kinetics of autotrophic denitrification by *Thiobacillus denitrificans* 283
Claus G, Kutzner HJ: Autotrophic denitrification by *Thiobacillus denitrificans* in a packed bed reactor 289
Decleire M, van Huynh N, Motte JC, De Cat W: Hydrolysis of whey by whole cells of *Kluyveromyces bulgaricus* immobilized in calcium alginate gels and in hen egg white 438
Eguchi SY, Nishio N, Nagai S: Formic acid production from H_2 and bicarbonate by a formate-utilizing methanogen 148
Evans CS: Properties of the β-D-glucosidase (cellobiase) from the wood-rotting fungus, *Coriolus versicolor* 128
Foda MS, Salama HS, Selim M: Factors affecting growth physiology of *Bacillus thuringiensis* 50
Habets-Crützen AQH, de Bont JAM: Inactivation of alkene oxidation by epoxides in alkene- and alkane-grown bacteria 428
Herrero AA, Gomez RF, Snedecor B, Tolman CJ, Roberts MF: Growth inhibition of *Clostridium thermocellum* by carboxylic acids: A mechanism based on uncoupling by weak acids 53
Hitschmann A, Stockinger H: Oxygen deficiency and its effect on the adenylate system in *Acetobacter* in the submerse acetic fermentation 46
Kelly CT, Moriarty ME, Fogarty WM: Thermostable extracellular α-amylase and α-glucosidase of *Lipomyces starkeyi* 352
Kiguchi T, Yanagi SO: Intraspecific heterokaryon and fruit body formation in *Coprinus macrorhizus* by protoplast fusion of auxotrophic mutants 121
Kulprecha S, Nihira T, Yamada K, Yoshida T, Nilubol N, Taguchi H: Transformation of lithocholic acid to a new bile acid, 3α, 15β-dihydroxy-5β-cholanic acid by *Cunninghamella blakesleeana* ST-22 211
Leão C, van Uden N: Effects of ethanol and other alkanols on the temperature relations of glucose transport and fermentation in *Saccharomyces cerevisiae* 359
Lohmann E, Hagedorn H: The effect of parathion on green algae. I. Uptake of parathion 268
López-Nieto MJ, Ramos FR, Luengo JM, Martin JF: Characterization of the biosynthesis in vivo of α-aminoadipyl-cysteinyl-valine in *Penicillium chrysogenum* 343
Lübbe C, Demain AL, Bergman K: Use of controlled-release polymer to feed ammonium to *Streptomyces clavuligerus* cephalosporin fermentations in shake flasks 424
Mabrouk SS, El-Shayeb NMA, El-Refai AH, Sallam LAR, Hamdy AA: Inhibitory activities of some marine algae on aflatoxin accumulation 152
Manczinger L, Ferenczy L: Somatic cell fusion of *Trichoderma reesei* resulting in new genetic combinations 72
Matzinger PK, Leuenberger HGW: Screening for microorganisms performing the stereoselective reduction of α-formyl-esters 208
Moreton RS: Modification of fatty acid composition of lipid accumulating yeasts with cyclopropene fatty acid desaturase inhibitors 41
De Mot R, Van Dijck K, Donkers A, Verachtert H: Potentialities and limitations of direct alcoholic fermentation of starchy material with amylolytic yeasts 222
Panbangred W, Fukusaki E, Epifanio EC, Shinmyo A, Okada H: Expression of a xylanase gene of *Bacillus pumilus* in *Escherichia coli* and *Bacillus subtilis* 259
Paszczyński A, Fiedurek J, Ilczuk Z, Ginalska G: The influence of proteases on the activity of glucoamylase from *Aspergillus niger* C 434
Patel GB, Mackenzie CR, Agnew BJ: Properties and potential advantages of β-galactosidase from *Bacteroides polypragmatus* 114
Puspito H, Fleet GH: Microbiology of sayur asin fermentation 442
Ratledge C, Holdsworth JE: Properties of a pentulose-5-phosphate phosphoketolase from yeasts grown on xylose 217
Sabbour MM, El-Zanfaly HT: Status of membrane-filter procedure for examination of water and milk for *Staphylococcus aureus* 364
Saddler JN, Hogan CM, Louis-Seize G: A comparison between the cellulase systems of *Trichoderma harzianum* E58 and *Trichoderma reesei* C30 139
Sugimoto S, Yabuta M, Seki T, Yoshida T, Taguchi H: Expression of pheA gene using P_R-P_L tandem promoter of bacteriophage lambda 336
Williams TM, Unz RF: Isolation and characterization of filamentous bacteria present in bulking activated sludge 273
Yong, FM, Wong HA, Lim G: Effect of nitrogen source on aroma production by *Trichoderma viride* 146
Zikmanis PB, Auzane SI, Auzina LP, Margevicha MV, Beker MJ: Changes of ergosterol content and resistance of population upon drying-rehydration of the yeast *Saccharomyces cerevisiae* 265

Environmental Microbiology

Abdul P, Lloyd D: The survival of antibiotic resistant and sensitive *Escherichia coli* strains during anaerobic digestion 373
Claus G, Kutzner HJ: Denitrification of nitrate and nitric acid with methanol as carbon source 378
Dolfing J: Kinetics of methane formation by granular sludge at low substrate concentrations: the influence of mass transfer limitation 77
Wildenauer FX, Winter J: Anaerobic digestion of high-strength acidic whey in a pH-controlled up-flow fixed film loop reactor 367

Rapid communication

Ditzelmüller G, Kubicek-Pranz EM, Röhr M, Kubicek CP: NADPH-specific and NADH-specific xylose reduction is catalyzed by two separate enzymes in *Pachysolen tannophilus* 297
Kawamori M, Morikawa Y, Takasawa S: Inductive formation of celluases by L-sorbose in *Trichoderma reesei* 235
Parekh S, Margaritis A: Inulinase (β-fructofuranosidase) production by *Kluyveromyces marxianus* in batch culture 446
